

## Smart SIM Dispensing. Seamless Digital Onboarding.

Introducing KORE, Wavetec's next-generation multi-platform, multi-purpose telecom self-service kiosk - powered by the Wavetec Smart Service Hub.

Designed for telecom operators ready to scale faster, onboard smarter, and deliver fully digital customer journeys.

### Multi-service Smart Platform

KORE enables:

- ✦ Instant SIM dispensing
- ✦ Digital KYC & biometric verification
- ✦ ID document scanning & OCR
- ✦ Secure payment integration
- ✦ AI-powered guided onboarding
- ✦ Real-time backend integration

From SIM purchase to activation completed in minutes.

### Powered by Wavetec Smart Service Hub

A software-first, enterprise-grade self-service platform that:

- Runs on a unified SDK across all devices
- Centralizes analytics, orchestration & control
- Delivers AI-driven guided journeys
- Supports multi-country compliance & localization

One platform. Multiple form factors. Infinite scalability.

### Designed for Telecom Evolution

KORE supports:

- ✓ New SIM sales
- ✓ SIM replacement & upgrade
- ✓ eKYC & digital verification
- ✓ Plan subscription & add-ons
- ✓ Multi-market regulatory compliance

Whether deployed in retail stores, malls, airports, campuses, or public service locations - KORE delivers a consistent, intelligent experience everywhere.

# KORE

## Enterprise-Grade Hardware. Secure by Design. Compliant by Standard.

KORE is built on Wavetec Smart Service Hub - a software-led, multi-device self-service platform designed for enterprise scalability across telecommunications and beyond.

At its core is one unified platform and SDK that runs seamlessly across all endpoints, enabling operators to reuse applications, integrations, UI components, and operational tooling across every deployment format.

This eliminates fragmented systems, reduces device-specific dependencies, and allows rapid scaling without rebuilding what already works.

Smart Service Hub enables:

- ▶ AI-driven onboarding and guided assistance
- ▶ Centralized reporting and operational visibility
- ▶ Unified orchestration across physical and digital touchpoints
- ▶ Built-in localization and multi-market compliance
- ▶ Seamless backend and third-party integration
- ▶ One platform. One ecosystem. Infinite adaptability.
